

Bringing Two Enhanced Oil Recovery Technologies into the Future of Energy

NaNoEOR

Zero-emissions oil recovery

- 94%+ viscosity reduction of heavy oil
- HIGH Return on Investment
- VERY Low CAPEX - no equipment
- Extend lifespan of declining oil wells
- Increase fractured shale oil production
- Increase heavy oil production
- Increase proved oil reserves

World's only proven downhole steam technology

Energy-efficient steam generator compared to the antiquated Once-Through Steam Generator (OTSG)

- 50%+ less fuel to convert water to steam
- 50%+ fewer greenhouse gas emissions
- 25%+ lower operating expenses
- 60%+ reduced CAPEX
- Delivers superheated steam to 6,000+ ft.
